FAO Eggert Ehmke

Ehmke Audio Balanced mode cables for the PonoPlayer

Dear Eggert

We are pleased to inform you that we have certified your balanced mode cables for the PonoPlayer as being of acceptable quality and correct specification according to Pono Tech Sheet documentation.

This certification applies specifically to the following Ehmke Pono balanced mode cables:

Type One cables – Connecting a PonoPlayer to a hifi system using XLR connectors

Type Two cables – Connecting a PonoPlayer to over ear headphones

We will inform our Pono Community of this certification. You may use the attached Pono certification logo in your documentation, your website and any social media content you may produce. We request that you refer to www.ponomusic when you use the logo.

If you wish to extend this certification to any other Ehmke cables and products, we ask that you send us any such cables to enable us to certify them. We will expedite this process so that there is as little delay as possible.

We wish you well with your projects and look forward to working with you in the future.

With very best regards

Ian Kendrick

On behalf of PonoMusic
